

## Adobe XD Course Outline:

Duration: 2 Days

Prerequisites:

Basic computer skills

### Course Objectives

At the end of this course the learner will be able to design basic wireframes to beautiful designs, create prototypes, add interactions, motion, animation and share and collaborate seamlessly with your team.

### Related Courses:

Adobe Photoshop, Adobe Illustrator

### Introduction

- General workflow
- Workspace basics (Home screen, panels, previews)
- Access UI design kits
- Cloud documents in Adobe XD
- Collaborate & coedit designs

### Design

- Artboards & grids
- Work with drawing & text tools
- Formatting text
- Importing content
- Work with components (nested, master components, swapping across documents)
- Add & edit multiple states components
- Work with linked assets
- Work with external assets (images, Photoshop, Illustrator)
- Creating compound shapes
- Filter assets
- Responsive resize & constraints
- Create repeating elements
- Move, align, distribute & arrange objects
- Create a mask with shapes
- Group, lock, duplicate, copy & flip objects
- Select, resize & rotate objects
- Set stroke, fill & drop shadow for objects
- Work with blur & blend effects in XD
- Manage assets & components
- Create & modify gradients
- Work with layers
- Export design assets
- Create scrollable artboards
- Designing with Data (Google sheets)
- Auto animate dash & gap patterns

## Prototype

- Interactions
- Voice Triggers & Speech Playback
- Auto-Animate
- Drag Gestures
- Preserve scroll position
- Export to After Effects
- Overlays
- Preview

## Sharing

- Share designs & prototypes
- Share design specs
- Inspect design specs
- Navigate design specs
- Review & comment design specs

## XD and Creative Cloud

- Adobe XD & Creative Cloud
- Using Creative Cloud libraries
- Add view options for XD mobile app

## General tips and tricks

### Plug-ins
