Welcome to MacOS Orientation Course Outline:

Duration: 1 Hours

Prerequisites:

No prerequisites of the MacOS environment are required for this course.

Course Objectives

New to Mac OS X? Disorientated? Is the jargon and terminology confusing you? In this short session we demystify the Mac. You will receive a basic orientation of OS X including an understanding of the Finder, System Profiler, Spotlight search and how to locate and open your applications and documents. You'll also learn how to customise your Mac so that it works for you and not vice versa.

Setup Requirements

A Mac device that has been freshly installed with the latest version of OS 10.15 Catalina.

Session Outline

- Understanding System Profiler
- Control your Applications (quit, resume and restart)
- Spotlight Search (manual and automatic)
- Applying Help Tools to find Menu-items
- Managing Full Screen Applications
- Mission Control & Gestures
- Dashboard Tools
